Variety selection is one of the most important steps in successful fruit growing. A variety may perform in one area of Texas and be a complete failure in our county. For this reason, your Extension Office has prepared a list of varieties that have demonstrated satisfactory performance for several years. Many of the older varieties such as “Elberta” peach, “Bartlett” pear, or “Stewart” pecan are not recommended for this area.

Fruit trees do not grow “true” from seed. Instead, they are budded or grafted onto a suitable rootstock adapted for our area. The correct rootstock is just as important as the recommended variety. Rootstock is set off with asterisks (*).

### APPLES
- Anna
- Ein Sheimer
- Dorsett Golden
- Gala
- Granny Smith
- *M.9, MM 111, MM 106 or seedling*

### APRICOTS
- Blenheim
- Royal
- *Nemaguard*

### BLACKBERRIES
- Arapaho
- Brazos
- Brison
- Navajo
- Rosborough

### FIGS
- Alma
- Celeste
- Texas Everbearing

### AMERICAN GRAPES
- Black Spanish
- Champanel
- Favorite
- Herbemont

### MUSCADINES
- Carlos
- Cowart
- Fry
- Higgins
- Jumbo
- Magnolia
- Regal

### HYBRID GRAPES
- S.V. 12-375

### JUJUBES
- Lang
- Li

### PEACHES
- Bicentennial
- Floridaking
- Harvester
- Hawthorne
- June Gold
- La Feliciana
- Redskin
- Rio Grande
- TexRoyal
- TexStar
- *Nemaguard*

### STRAWBERRIES
- Chandler

### PECANS
- Caddo
- Candy
- Cape Fear
- Choctaw
- Desirable
- Eliott
- Kanga
- Kiowa
- Osage
- Prilop

### PERSIMMONS
- Eureka
- Fuyu (Fuyugaki)
- Hachiya
- Tamopan
- Tane-nashi

### Pears
- Garber
- Kieffer
- LeConte
- Orient
- Pinapple
- *Calleryana*

### PLUMS
- Allred
- Bruce
- Methley
- *Nemaguard*
